

SUB-MICRON COMPUTERIZED MICROMETER HEAD MICROTECH

ISO/IES 17025:2006 (cert. № 4K051)

Quality management system
ISO 9001:2015 (cert. № U228396)

Item No	Range	Resolution	Accuracy	Protection class	Data output	Data output		Calibration
	mm	mm	mm			USB	Wireless	ISO 17025
110181027	0-25	0,0001	±0,002	IP-65	Error & Temp comp. Preset. Memory Max/Min Limits	+	max 50m	+

Parameters	
LED display	color 1,5 inch
Power supply	Rechargeable Li-Pol battery
Charging port	micro-USB
Case material	Aluminium
Buttons	Switch, Reset
Wireless data transfer	10+m

**PRECISION MEASUREMENTS**

MICROTECH computerized micrometer with 0.1 resolution can be used for high precisor measurements in manufacturing, automotive medical industry and for calibration

**COLOR GO/NOGO INDICATION**

Easy and quick limits control.
It's possible setup max and min value throw menu.
Color indication reduce possibility of error during control

**INTERNAL MEMORY**

Computerized micrometer has memory manger with possibility saving data to folders. Separate Data's or Folders can be transfer Wirelessly to MICROTECH Software (Windows, Android,iOS)

**FORMULA MODE**

In Formula mode we use Ax^2+Bx+C

Main using of this function is:

- Preset function
- Magnification of measured value

For customers request Formula can be updated

**ERROR COMPENSATION**

It's possible to make mathematical error compensation. Just re-calibrate micrometer with gauge block set and save results. Micrometer will indicate measuring results include re-calibration.

**TEMPERATURE COMPENSATION**

Temperature compensation function gives possibility recalculate details sizes with high or low temperatures to normal (20C conditions). Available recalculation for 7 materials

- SWITCH ON DEVICE** - button push (1 sec)
- SWITCH OFF DEVICE** - auto switch off (configuring throw DISPLAY SETTING menu)
- button push (3 sec)

Clean the oil from the measuring surfaces of micrometer by cloth.

Turn on micrometer by pressing SWITCH ON button.

Check the setting display to zero. Contact with each other (or with setting gauge) measuring surfaces of the anvil and the spindle, using the ratchet and take a measurement.

Rotation the micrometer screw in the direction of convergence measuring surfaces using the ratchet.

For zero setting, press the ZERO button on Touchscreen.

CHARGING

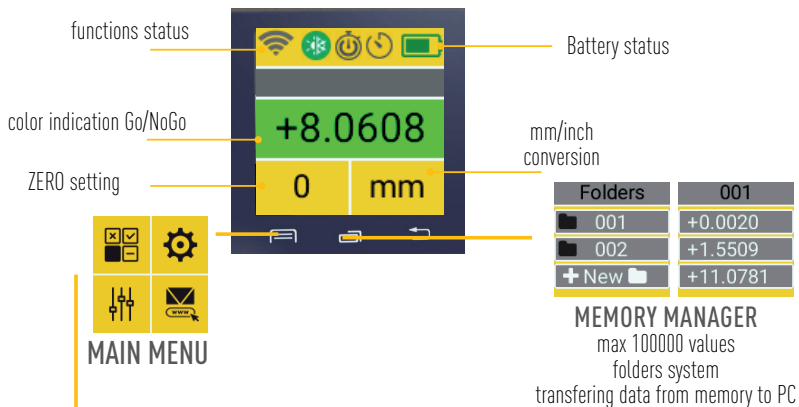

For charging connect USB cable

BUILT-IN BATTERY - rechargeable Li-Pol battery

DATA TRANSFER DISTANCE FOR INTELLIGENT INSTRUMENTS

- All MICROTECH Intelligent instruments has internal memory. You can collect data to memory and when it will be necessary transfer all data to the peripheral device with no data losing.
- It's possible transfer data, like in Wireless instruments up to 15 m or up to 50 m with external antenna
- USB port can be used to transfer data directly to Windows PC
